Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks, filed 2/23/05, with respect to the rejection(s) of claim(s) 1-3, 6-8, 11-13 and 21-24 and 21 under 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, upon further consideration, a new ground(s) of rejection is made in view of Powell et al (US 5,721,788).

Examiner note: Powell describes a method and system for embedding signature into an original image to create a signed image. After selecting a large number of signature points, the signature points are altered (processed) to form the signature. The signature points are stored for later use. The signatures are not visible to the human eye.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3, 6-8, 11-13, 21-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Powell et al (US 5,721,788).

As to claims 1, 6, 11 and 21, Powell et al disclose an image processing apparatus, comprising:
a processor for performing image processing on original image data to obtain processed image data, the original image data and the processed image data being comprised of plurality of pixels (Powell discloses in Abstract lines 6-8 that "signature points are selected from among the pixels of an original image"), each of which is expressed by using multiple bits (column 3, lines 35-47),
wherein the processor embeds bits, which describes information different from information representing said processed image data, in pixels of said processed image data placed at predetermined positions on an image represented by said processed image data (column 3, lines 49-67).

As to claims 2, 7, 12, Powell et al disclose an image processing apparatus according to claim 1 (see claim 1, above), wherein said pixels are dispersed at a plurality of predetermined positions on said image (column 1, lines 60-64).

As to claims 3, 8, 13, Powell et al disclose an image processing apparatus according to claim 1 (see claim 1, above), wherein said information different from information of said processed image data is information describing the contents of image processing performed on said original image data to obtain said processed

image data (column 3, lines 35-55 and fig.4 wherein local extremes of luminance or color corresponds to this portion of claim).

Claims 22-24 are similarly analyzed and rejected.

Allowable Subject Matter

4. Claims 4-5, 9-10, and 14-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
